OBJECTIVE

Solidity smart contract developer and MSc IT student with 3 deployed DApps on Ethereum Sepolia testnet, 30+ smart contracts built across beginner to advanced DeFi levels, and hands-on experience with Hardhat, Ethers.js, Web3.js, and IPFS. Seeking a Blockchain Intern or Junior Blockchain Developer role — open to remote, hybrid, or on-site opportunities anywhere.

EDUCATION

- | | |
|---|-------------------------|
| • S.S.C. (Sanskar Bharti Vidhyalaya) | Percentage 85.66 |
| • H.S.C. (Sanskar Bharti Vidhyalaya) | Percentage 91.20 |
| • Bachelor of Science in Information Technology (2022– 2025) | CGPA 9.18 |
| • Master of Science in Information Technology (2025 – Ongoing) | CGPA 9.26 |

TECHNICAL SKILLS

- **Programming languages:** JavaScript, Solidity, Rust, Python, C++
- **Blockchain & Web3:**
 - Ethereum (EVM), Solana, Smart Contracts, DeFi Protocols
 - Hardhat, Truffle, Remix IDE, Foundry
 - MetaMask, Web3.js, Ethers.js
 - DApp Architecture, On-chain Transactions, EVM-Compatible Chains
- **Software & Tools:** Remix IDE, Visual Studio Code, Visual Studio, Android Studio, Eclipse
- **Frameworks & Tools**
 - React.js, Node.js, Next.js
 - **Git, GitHub, Firebase**

ACADEMIC PROJECTS

PayOnChain – Cloud-Native Web Application with Blockchain Payments (Solidity, React.js, Node.js, AWS, Ethereum, MetaMask) [GitHub](#)

Designed and developed a cloud-native web platform integrating a Solidity smart contract (5+ functions) deployed on Ethereum Sepolia testnet for secure, transparent payment processing. Implemented on-chain transaction validation and event logging, integrated MetaMask for wallet authentication and transaction signing across 20+ manual test transactions. Built a React.js frontend and Node.js backend hosted on AWS EC2, enabling end-to-end user flows — wallet login, payments, order management, and a real-time dashboard.

HexaCare – Blockchain & AI Powered Smart Healthcare (Solidity, React.js, Hardhat, Python, IPFS, MetaMask, Ethereum) [GitHub](#)

Designed and developed a decentralized healthcare system storing medical report hashes on a Solidity smart contract deployed on Ethereum Sepolia testnet, ensuring tamper-proof data integrity and immutability. Integrated IPFS–Pinata for decentralized PDF report storage (20+ files tested) and MetaMask for secure wallet authentication and transaction signing. Built a React.js frontend supporting seamless PDF upload and on-chain hash verification. Developed a Python-based analysis module that extracts 10+ medical parameters, compares them against standard ranges, and generates patient-friendly explanations with flagged abnormalities and actionable recommendations.

Decentralized Voting DApp – (Solidity, Next.js, Hardhat, Node.js, MetaMask, Ethereum) [GitHub](#)

Built and designed a Solidity smart contract (7+ functions) on Ethereum Sepolia testnet enabling secure, transparent voting with one-vote-per-user enforcement and configurable candidate support. Integrated MetaMask for wallet authentication, tested across 5–10 voter accounts, and used Hardhat for deployment.

Talk Buddy AI – AI-Based English Communication Tutor (React, Python, ML, Computer Vision Firebase Database) [GitHub](#)

Built and deployed an AI tutoring system evaluating speech, text and behavioral cues for communication skill assessment. Implemented adaptive practice and progress tracking to analyze user improvement across repeated sessions.

DailyNest – AI-Powered Integrated Support System for Autism Spectrum Disorder (Python, ML, NLP, Computer Vision, LLMs) [GitHub](#)

Co-developed and created a unified AI platform with 6 integrated modules supporting routines, emotion regulation, communication, and caregiver insights. Implemented CNN-based facial emotion recognition (~71% accuracy on ASD-specific data) with emotion-driven adaptive system routing.

CERTIFICATIONS

- **Blockchain Developer Training** – [Simplilearn](#) - 2026
- **Blockchain Basics** – [Cyfrin Updraft](#) - 2026
- **Smart Contract Developer** – [Cyfrin Updraft](#) - 2026
- **Prompt Engineering** – [Cognitive Class](#) - 2026
- **Gemini Certified Student** – [Google Gemini](#) - 2026
- **Rust Programming Basics** – [Cyfrin Updraft](#) - 2026
- **Software Engineer Intern** - [HackerRank](#) - 2025
- **Solana Developer** – [Cyfrin Updraft](#) - 2026
- **Problem Solving (Basics)** - [HackerRank](#) - 2025

AWARDS & ACHIEVEMENTS

- **Co-authored** a peer-reviewed AI **research paper**; received **Best Research Paper Award**
- Attended **Student Conference at SRLIM** (Smt. Shardarani Rameshchander Luthra Institute of Management)
- Served as **Technical General Secretary**
- **Finalist**, Inter-University **Hackathon** (CHARUSAT)
- **1st Runner-Up, Relay Coding** Competition (Department Tech Fest)
- **2nd Runner-Up, Tech Fest** (Dual Inter-Department Competitions)
- Solved **450+ DSA** problems on **LeetCode**
- Achieved **3–5 star ratings** across **multiple programming languages** on **HackerRank**
- Completed **30 Days Smart Contract Challenge**
- **Student Representative, Board of Studies** (University Level)

30 DAYS 30 SMART CONTRACTS – Learning with AI ([GitHub](#))

- **Beginner Level Smart Contracts :**
1) Simple Wallet Contract, **2)** Voting System (DAO style), **3)** Crowd Funding Platform, **4)** To Do List on Blockchain, **5)** ERC20 Token, **6)** NFT Minting (ERC 721), **7)** Escrow Contract, **8)** Lottery Draw, **9)** Time Locked Wallet, **10)** Multi Signature Wallet
- **Intermediate Level Smart Contracts :**
1) Decentralized Marketplace, **2)** Staking Contract, **3)** Yield Farming Protocol, **4)** Decentralized Exchange (Mini-DEX), **5)** Subscription Payment System, **6)** NFT Marketplace, **7)** DAO Treasury Management, **8)** Insurance Smart Contract, **9)** Gasless Transaction (Meta-TX), **10)** Price Feed Consumer
- **Advance Level Smart Contracts :**
1) Decentralized Lending & Borrowing Protocol, **2)** Flash Loan Contract, **3)** Cross Chain Token Bridge, **4)** Upgradable Smart Contract (UUPS / Proxy), **5)** Decentralized Identity, **6)** Prediction Market, **7)** Layer-2 Rollup, **8)** On-Chain Governance, **9)** NFT Fractional Ownership, **10)** DEX Aggregator (Smart Routing System)
