OBJECTIVE

Blockchain-focused MSc IT student with hands-on experience in developing Ethereum-based DApps using Solidity, Hardhat, and Web3.js. Seeking a Blockchain Intern / Junior Blockchain Developer role to contribute to smart contract development, decentralized applications, and Web3 solutions while learning from real-world projects.

EDUCATION

• S.S.C. (Sanskar Bharti Vidhyalaya)	Percentage 85.66
• H.S.C. (Sanskar Bharti Vidhyalaya)	Percentage 91.20
• Bachelor of Science in Information Technology (2022– 2025)	CGPA 9.18
• Master of Science in Information Technology (2025 – Ongoing)	

PROJECTS

Decentralized Voting DApp – (Solidity, Next.js, Hardhat, Node.js, MetaMask, Ethereum) [GitHub](#)

Developed Designed and built Ethereum smart contracts in Solidity to enable secure, transparent voting with one-vote-per-user enforcement. Integrated MetaMask for wallet authentication and transaction signing. Used Hardhat for contract deployment and testing, and Next.js for the frontend interface enabling real-time vote tracking.

Talk Buddy AI – AI-Based English Communication Tutor (React, Python, ML, Computer Vision Firebase Database) [GitHub](#) | [Demo](#)

Built and deployed an AI tutoring system evaluating speech, text and behavioral cues for communication skill assessment. Implemented adaptive practice and progress tracking to analyze user improvement across repeated sessions.

DailyNest – AI-Powered Integrated Support System for Autism Spectrum Disorder (Python, ML, NLP, Computer Vision, LLMs) [GitHub](#)

Co-developed and created a unified AI platform with 6 integrated modules supporting routines, emotion regulation, communication, and caregiver insights. Implemented CNN-based facial emotion recognition (~71% accuracy on ASD-specific data) with emotion-driven adaptive system routing.

TECHNICAL SKILLS & CERTIFICATIONS

- **Programming languages:** JavaScript, Solidity, Rust, Python, C++
- **Blockchain & Web3:**
 - Solidity, Ethereum, Smart Contracts
 - Hardhat, Truffle, Remix IDE
 - MetaMask, Web3.js, Ethers.js
 - DApp Architecture, On-chain Transactions
- **Software & Tools:** Visual Studio Code, Visual Studio, Android Studio, Eclipse, NetBeans, Remix IDE
- **Frameworks & Tools**
 - Next.js, React.js, Node.js
 - Git, GitHub, Firebase
- **Certificates:** HackerRank SQL (Basics & Intermediate), Software Engineer Intern, Python (Basics), Problem Solving (Basics)

AWARDS & ACHIEVEMENTS

- Student of the Batch 2022 | **Technical General Secretary** | **Finalist – Inter-University Hackathon** (CHARUSAT) | 1st Runner-Up – Relay Coding | **2nd Runner-Up – Tech Fest** | **250+ DSA Problems (LeetCode)** | **3–5 Stars** across multiple programming languages on **HackerRank** | **Co-author** of a peer-reviewed **AI Research Paper**
